INTERVIEW SUMMARY PURSUANT TO 37 C.F.R. § 1.133

Art Unit 3736

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Sir:

This paper responds to the Interview Summary mailed on August 11, 2004 with the Notice of Allowance in the above-referenced case. Once month is provided from the date of mailing of the Interview Summary. This response to the Interview Summary therefore is timely. Applicant's response begins on **page 2** of this paper.

Application Number: 10/035,083

Applicant: Terwilliger et al.

Examiner: John P. Lacyk

Interview Date: August 6, 2004

Type of Interview: Telephonic

Participants: Examiner Lacyk and Sheldon R. Meyer, Reg. No. 27,660

Exhibits: None.

Claims Discussed: Claims 93 (Previously presented) and Claims 157-158 (New)

Prior Art Discussed: U.S. Pat. No. 6,497,646 to Candelaria et al., issued Dec. 24, 2002.

Principal arguments presented to the examiner: The examiner's amendment was accepted (see below).

Agreement was reached as follows: Sheldon Meyer agreed to the proposed examiner's amendment of claim 93, to read:

93. A therapeutic element comprising:

a polymeric material;

a plurality of radioactive seed elements; wherein said polymeric material forms an elongated member by encapsulating and connecting adjacent radioactive seed elements end-to-end at desired intervals said radioactive seed elements being encapsulated and connected without the use of spacers; and

said elongated member being axially rigid and radially flexible.

Mr. Meyer further agreed to the proposed examiner's amendment adding the following two claims:

⁶² 157. The therapeutic element of claim ²⁹ 124 wherein the therapeutic element does not comprise spacers.

⁶³ 158. The therapeutic element of claim ²⁹ 124 wherein the radioactive seed elements are secured

along the elongate member without spacers.

Finally, Examiner Lacyk noticed that the claims submitted December 19, 2003 inadvertently omitted claim 120; accordingly, the examiner and Mr. Meyer agreed that it would be appropriate to renumber the claims 121-157.

In light of the above, it is respectfully submitted that all of the claims now pending in the subject patent application should be allowable, and a Notice of Allowance is requested. The Examiner is respectfully requested to telephone the undersigned if he can assist in any way in expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any overpayment to Deposit Account No. 06-1325 for any matter in connection with this response, including any fee for extension of time, which may be required.

Respectfully submitted,

Date: September 13, 2004
